This project has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement N° 864266

Introduction

For this deliverable D7.3 “Content of Regional Workshops round 1 (6 languages)”, we have chosen to adopt a **storytelling format**, which is an original and innovative way to present such contents.

A storytelling document is an online document that embeds texts, images, videos and downloadable files in a reader-friendly way. It is particularly well-suited to present the contents of the Capacity Building webinars that the NESOI consortium have held in 6 languages - with 3 webinar sessions per language.

By using this approach, we were able to listen to our audience needs since the beginning, focusing to deliver an inspiring, simple to understand and ready to use & share deliverable.

With all the techniques explained above we plan to create impact by inspiring people with the tone and style chosen to deliver these contents.

This strategy aims to motivate our users towards action and consequently to have more good projects benefiting of NESOI’s offer.

The present document provides the links to these storytelling documents in each language.

This project has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement N° 864266
