

The EU Islands Facility NESOI is pleased to introduce the clean energy projects receiving its support:

GRenPLightC

Global renovation of public lighting in Corsica

“This project is a formidable tool for enhancing the image of an innovative and forward-looking Corsica, confirming its pioneering character for the energy transition”

Country  FRANCE	Island CORSICA	Project promoter Agence d'Aménagement durable, d'Urbanisme et d'Energie de la Corse (AUE)	Sector Public lighting	Project value 20,000,000 €
----------------------------------------------------------------------------------------------------------------------	---------------------------------	-----------------------------------------------------------------------------------------------------	----------------------------------	--------------------------------------

What is the project about?

- The project consists in amplifying AUE's approach in providing support to municipalities to renovate more than 20,000 lighting points by 2023. The renovation makes use of LED technology and of a specific management of night-time lighting profiles through power variation or extinction.
- It also aims to establish a Regional Public Lighting Chart based on the widest possible benchmark, an evaluation of the operations realised and a dialogue with institutional actors, professionals and associations.
- The project will also support Corsica's future candidature for the International Dark Sky Reserve label.

How will the EU Islands Facility NESOI support the project?

- Analysis of AUE procedures and documents
- Proposals for a better actions and evolution of AUE tools (technical perspective)
- Feedback on global public lighting renovation at local, national and EU level
- Feedback in economic and financial modelling and fund matching
- Support in elaboration of consultations documents for the regional Chart
- Support during Regional Chart elaboration
